

Doubling the farmer's income through latest technological (Agri-allied) Interventions:

Doubling the farmer's income is a set goal of Union Govt. to be achieved by 2022. In this stride agri-scientific fraternities have been tirelessly intervening and coming up with latest and innovative agricultural technologies. In this respect SBKV has been playing a pivotal role in disseminating of those technologies to the farmers. Farmers cum beneficiaries are being covered under different mandatory interventions like FLD, capacity building programmes etc which resulted in increased income by reducing the cost of cultivation. Followings are some of the achievement made by SBKV during 2017-18-
